FOR CLEANING METAL

GENERAL INFORMATION

Metal cleaning with Magna-Bon® Sorbetrool™ in preparation for coating applications is far superior to cleaning with grinders, wire brushes, etc. It will remove carbon and rust molecules from the surface as well as from the microscopic pores of the metal. This procedure creates pits in the metal for better paint adherence.

Magna-Bon® Sorbetrool™ is a very strong acidic chelate. It has the capability of chelating metal ions and holding them for long periods of time. The word "Chelate" is a Greek word meaning "claw". That is, it will wrap around, bond, or hold to other materials with a very tight grasp. Magna-Bon® Sorbetrool™, with its extra donor proton, will tightly attach itself to another electron, as a magnet would do.

Magna-Bon® Sorbetrool™ is a 100% chelate, meaning that 100% of the molecules in Magna-Bon® Sorbetrool™ will attach to equal amounts of metal ions. Magna-Bon® Sorbetrool™ is the only 100% acidic chelate known today. Where time is involved, Magna-Bon® Sorbetrool™ should always be used as the chelating agent.

DIRECTIONS FOR USE

RUST REMOVAL AND METAL CLEANING: Magna-Bon® Sorbetrool™ will not remove rust or clean metal that has oil on its surface. Magna-Bon® Sorbetrool™ will not penetrate

hydrocarbons contained in many petroleum products. Therefore, metal should be clean, free of oil and dirt before rust removal can take place. For best results mix one (1) part of Magna-Bon® Sorbetrool™ with three (3) parts water, and either spray the mixture onto the metal or dip the metal into this solution. Approximately 5 to 10 minutes are sufficient in most cases, but longer time may be required for heavy rust concentrations. When rust is thoroughly saturated with the Magna-Bon® Sorbetrool™ mixture, it can then be wiped off, or for maximum results, a high pressure hot water sprayer may be used. Caution should always be taken in that rust and iron have the same molecular structure and Magna-Bon® Sorbetrool™ cannot tell when it has completed removal of the rust particles. If not removed, Magna-Bon® Sorbetrool™ will continue to remove the iron molecules from the steel. This will create deterioration of the metal. When metals are thoroughly cleaned, before coatings are applied, rinse in clean caustic solution such as baking soda mixed with water. Rinse thoroughly and allow to dry before applying paint or coatings.

RUST AND RUST APPEARING MATERIAL ON BUILDINGS, ETC: Rust and rust appearing material that buildup on buildings, trees, etc., in shaded areas can be removed by applying a mixture of one (1) part Magna-Bon® Sorbetrool™ to three (3) parts water. Thoroughly

cover the entire affected areas with a fine mist spray. Within thirty (30) minutes the rust and rust appearing material will turn yellow indicating that the bond has been broken. To remove, simply rinse with a high pressure washer. **CAUTION** should be taken as Magna-Bon® Sorbetrool™ will cause a foaming action when spilled onto concrete. This is a reaction between the alkaline in the concrete or brick and the Magna-Bon® Sorbetrool™.

LIMITED WARRANTY AND LIMITATIONS OF REMEDIES: Seller warrants that the product conforms to the chemical description and is reasonably fit for the purpose stated on the label for use under normal conditions, but makes no other warranties of FITNESS OR MERCHANTABILITY expressed or implied or any other warranty if the product is used contrary to the label instructions or under abnormal conditions or under conditions not foreseeable to the seller. In no case shall the seller be liable for more than the cost of this product to the buyer, and will in no event be liable for any consequential special or indirect damages connected with the use or handling of this product. This product is offered and the buyer or user accepts it subject to the foregoing terms which may not be varied.

MATERIAL SAFETY DATA SHEET
May be used to comply with
OSHA's Hazard Communication Standard

U.S. DEPARTMENT OF LABOR
Occupational Safety and Health Administration
(Non-Mandatory Form)

THE NEW MAGNA-BON CORPORATION
1531 N.W. 25th DRIVE
OKEECHOBEE, FL. 34972

MATERIAL SAFETY DATA SHEET

Product Identity: **MAGNA-BON SORBERTROL**

Emergency Telephone Number: **1-800-424-9300**
(CHEMTREC)

Manufacturer's Name and Address

THE NEW MAGNA-BON CORPORATION, INC.
1531 N.W. 25th DRIVE
OKEECHOBEE, FL. 34972
1-863-357-0400

DATE PREPARED: July 22, 1993

Signature of Preparer (Optional)

Section 1 - Hazardous Ingredients Identify Information

NONE

Section 11 - Physical and Chemical Characteristics

Boiling Point:	224.2°F	Specific Gravity:	1.35
Vapor Pressure (MM Hgt.):	0.1mm 68°F	Melting Point:	N/A
Vapor Density (Air=1):	1.00	Evaporation Rate:	N/A
Solubility in Water	Very Soluble		
Appearance and Odor	Clear Liquid; Mild Odor		

Section III - Fire and Explosion Hazard Data

Flash Point:	None	Flammable Limits:	None
---------------------	-------------	--------------------------	-------------

Section IV - Reactivity Data

Stability:	Stable
Incompatibility (Materials To Avoid):	Avoid mixing with strong bases and strong reducing agents.
Hazardous Decomposition of Byproducts:	Sulfuric acid fumes may be generated by thermal decomposition.
Hazardous Polymerization:	Will not occur

Section V - Health Hazard Data

Health Hazards (Acute and Chronic):

Avoid breathing fumes

Signs and Symptoms of Exposure:

allergies may occur. Skin irritation may occur. Avoid prolonged body contact. (Always use protective clothing).

Medical Conditions Generally Aggravated by Exposure:

Sulfur allergies may occur.

Emergency and First Aid Procedures:

Treat as a sulfur base reaction. Always move to fresh air.

Section VI - Precautions for Safe Handling and Use

Steps to be Taken In case Material is Released or Spilled:

Flush with water into a retaining area. Contain and neutralize with bicarbonate of soda or limestone.

Waste Disposal Method:

Neutralize with bicarbonate of soda or fertilizer grade limestone and dispose of in accordance with all applicable Federal, State and Local Environmental Regulations.

Precautions to be taken in Handling and Storage:

Avoid Storage in excessive heat, as expansion of container may occur creating spillage.

Other Precautions:

Do Not store in nylon or galvanized equipment. Concentrate will destroy nylon and cotton cloth.

Section VII - Control Measures

Respiratory Protection (Specify Type):

Adequate local ventilation

Ventilation: Yes

Local Exhaust: Yes

Protective Gloves: Yes

Eye Protection: Yes

Work Hygienic Practices: Body Shower for Prolonged Skin Contact.
